

BioBoost (MIC + B12)

What is BioBoost?

B12

A water-soluble vitamin involved in the metabolism that helps the body use fat & carbohydrates for energy & to make new protein.

Methionine

An essential amino that speeds up fat removal within the liver & neutralizes toxins, promoting lean muscle growth.

Inositol

An essential amino that plays a critical role in metabolic function.

Choline

An essential nutrient that helps to regulate memory, mood, muscle control & many other functions.

Why use BioBoost?

BioBoost boosts energy and discourages the onset of general fatigue. Complements your lifestyle to help break through plateaus.

MIC stands for Methionine Inositol Choline. Research on MIC has been done for over 80 years and has shown it to have implications on the liver and metabolism. Cited by several journal articles to support lean muscle building, weight loss and energy. These compounds enhance the liver and gallbladder's role by decreasing fat deposits and speeding up metabolism of fat.

Benefits of BioBoost

1. Encourages fat burn to help achieve fat loss goals
2. Particularly effective at encouraging the body to burn fat from hard to lose areas
3. Boost energy
4. May help regulate sleep

How to use:

Typically, the BioBoost is administered 2x per week. The injection is given intramuscularly.
